Green Employment Pathway: Sustainable Careers in BCP

Delivered in partnership with HACT and supported by the JPMorgan Chase Foundation

Programme Overview

The programme enable's residents, with a focus on those living in social housing (circa 6%), to access advice, guidance, vocational training, work and better work related to green skills roles and organisations.

Eligibility Criteria

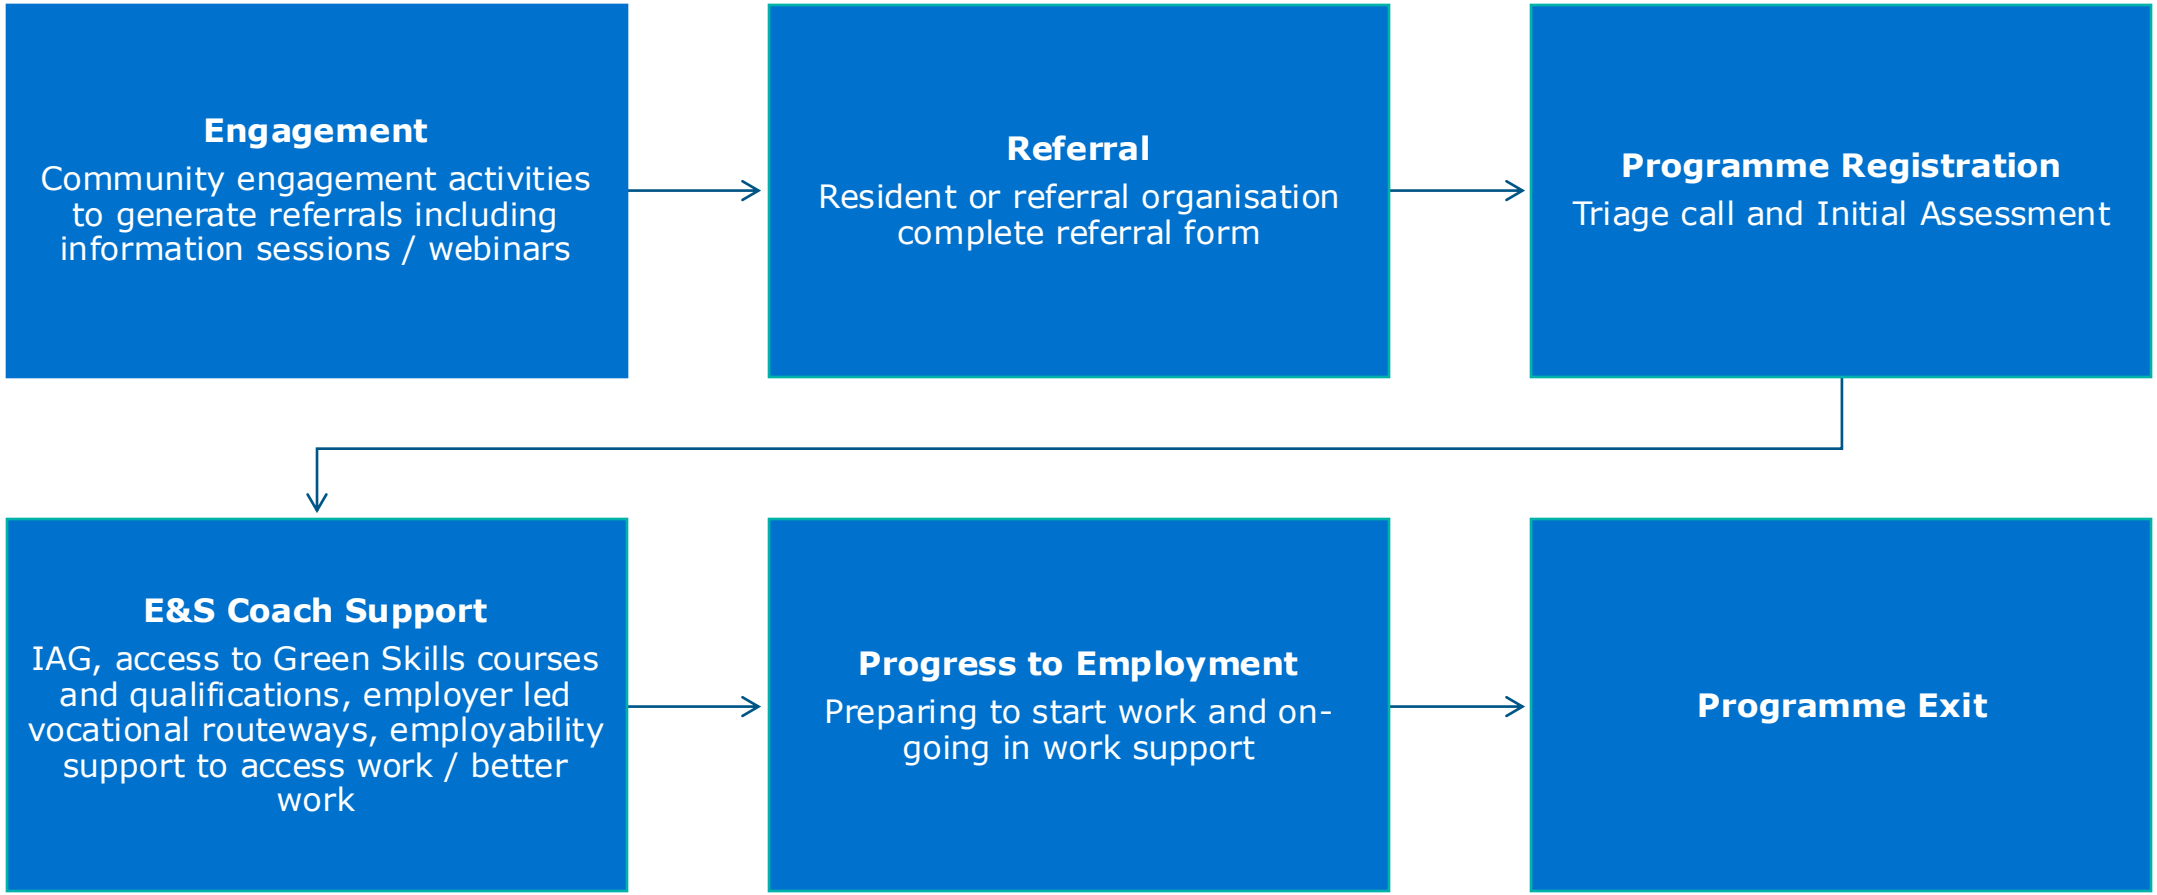

Age 18+

Living in Bournemouth, Christchurch or Poole

Not in paid work, in insecure employment or looking for a career change

Customer Journey

Sovereign Network Group

Observations.....

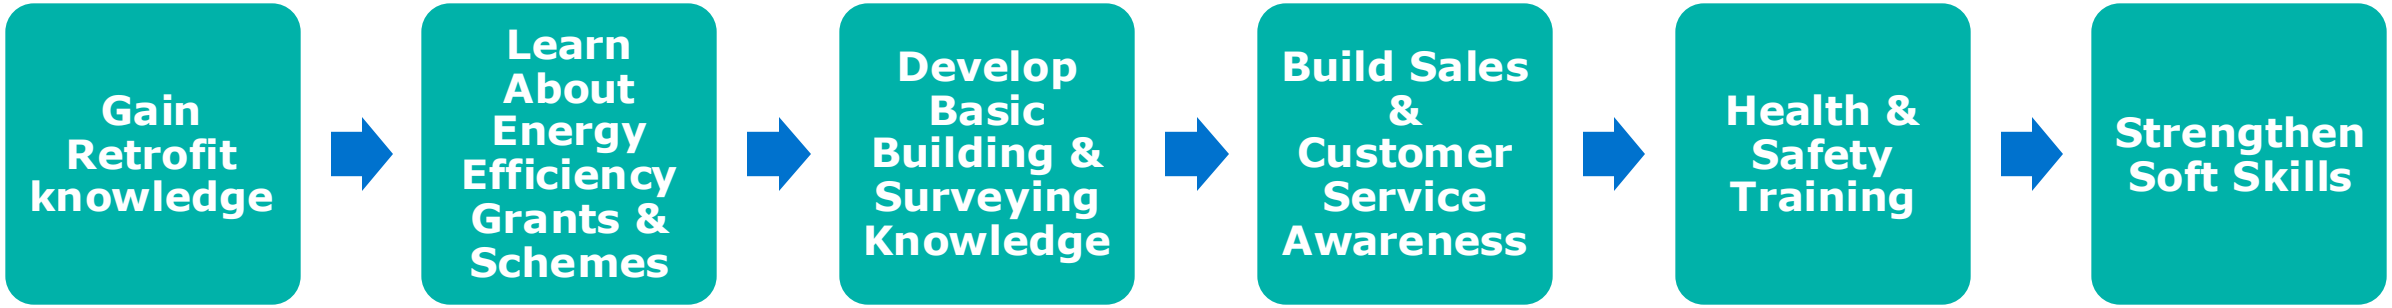

Through our work engaging with communities and supporting individuals into green careers, we've gained valuable insights into the challenges, opportunities, and perceptions surrounding the sector.

Example - Domestic Energy Assessor Routeway

We have been working with customers to support them to become Domestic Energy Assessors. We developed a training pathway to prepare the customers for the formal qualifications.

We have identified a six-step pathway that focuses on building retrofit knowledge, understanding energy efficiency schemes, basic surveying skills, customer service, health and safety training, and vital soft skills like professionalism and adaptability.

We started working with the Retrofit Academy as they received funding from the government through the Warm Home Skills Programme to cover 80% of the DEA course costs. We now have customers completing the formal Domestic Energy Assessor course.

6 Funding has closed, cost of training is now £2550 + VAT
